TAR College Cyber Centre wins commendation in the 2011 Pertubuhan Akitek Malaysia (PAM) Awards. The PAM 2011 Awards recognises the excellence in design and the advancement of quality built environment that has social, physical and cultural impact in Malaysia.

Jury’s comments: Shopping-mall typology is used to good effect – it is colourful, youthful and energetic, suited to a college’s cyber centre.

The first phase of the KTAR main campus in Setapak, KL, was the completion of the Cyber Centre, which was to represent a “modern learning shell” infused with lifestyle elements. The internal administrative, teaching and learning spaces are designed to be transparent to light penetration from a main atrium, which also serves as a multi-functional pod and a gathering space for informal interaction.
